Gov. Roy Asberry Cooper III,

Clean, renewable energy has been growing at an amazing rate over the past 10 years. It's clear: The clean energy revolution is already here.

The amount of sunlight that shines on our country in a single year could provide 100 times more power than we need, and it's pollution-free. But solar isn't growing as fast as it should. We can make North Carolina a leader in solar energy, but to do it, we'll need to revamp outdated policies to encourage more people to go solar, and we'll need to put smart, forward-looking ahead of the short-term interests.

I'm calling on you to support pro-solar policies to put North Carolina at the forefront of the clean energy revolution.

Sincerely,

Mary Boatwright  
2040 Englewood Ave  
Durham, NC 27705
